

Rostislav Grishin

Network & IoT Security Engineer

Edmonton, AB, Canada | 780-599-0885 | grishin.rost@gmail.com | rostman.net

PROFESSIONAL SUMMARY

Network and IoT Security Specialist with deep experience securing physical access control and enterprise hardware (IoT/OT). Skilled in designing VLAN architectures to isolate vulnerable edge devices from core corporate data networks. Strong background in configuring encrypted VPNs, auditing network traffic, and managing Linux server environments. Actively preparing for CompTIA Security+ certification. Focused on protecting infrastructure by reducing attack surfaces, preventing lateral movement, and implementing secure remote access protocols.

CORE COMPETENCIES

- Network Segmentation & VLAN Architecture
- Firewall & Secure VPN Configuration
- IoT / OT Infrastructure Security
- Linux Server Administration & Hardening
- Proactive Monitoring & RMM Implementation
- Threat Surface & Lateral Movement Reduction
- Physical Security & Access Control Systems
- Disaster Recovery & Backup Strategies

PERSONAL CLOUD INFRASTRUCTURE & HOME LAB

- Administer a remote Linux Virtual Private Server (VPS) via OVHcloud (4 Cores, 8GB RAM, 75GB SSD) to host custom software projects and practice server hardening.
- Develop and maintain a custom CRM database and a language-learning application, writing deployment scripts and managing secure API integrations.
- Configure server-level firewalls, monitor incoming network traffic for anomalies, and apply routine security patches to protect hosted data.

TECHNICAL SKILLS

- **Networking & Security:** TCP/IP, DNS, DHCP, Inter-VLAN Routing, Network Segmentation, Encrypted VPN Tunnels
- **Infrastructure & Hardware:** Fortinet (FortiGate), Cisco Meraki, Aruba, Enterprise Rack Engineering
- **IoT & Access Control:** AXIS Communications, Brivo, CDVI, DSC Neo
- **Systems & Automation:** Linux, Windows Server, Python CLI scripting, Shell scripting, OvrC, Domotz

PROFESSIONAL EXPERIENCE

Network Security & Integration Specialist (Contract)

Oct 2025 – Present

Unified Automation Inc. | Edmonton, AB

- Secure enterprise IoT and physical access control systems by implementing strict VLAN network segmentation.
- Prevent unauthorized lateral network movement by logically isolating high-risk edge hardware from core corporate data networks.
- Configure encrypted VPN tunnels for secure remote diagnostics, removing the need for vulnerable public-facing IP addresses.
- Monitor network health and security status for 50+ critical endpoints using proactive RMM tools to prevent system downtime.

Security Integration Specialist (Contract)

Mar 2025 – Oct 2025

Signature Technology Integrations | Edmonton, AB

- Conducted technical security audits on undocumented legacy networks to identify vulnerabilities and restore system stability.
- Managed the secure network integration of 20+ commercial cloud-based access control systems, ensuring data privacy and compliance.
- Designed network traffic rules to separate high-bandwidth IP cameras from internal business networks, improving overall network performance and security posture.

Infrastructure & Network Security Engineer

Jan 2022 – Oct 2024

TopAudio | Herzliya, Israel

- Designed multi-layer VLAN architectures for high-density AV and physical security deployments to ensure strict traffic separation.
- Secured Fortinet, Cisco, and Araknis networking infrastructure within structured 42U rack systems.
- Automated proactive RMM monitoring workflows, reducing on-site emergency visits by 30% through early detection of system faults.
- Mentored junior engineers and formalized technical deployment documentation to enforce consistent security standards.

Network Deployment Engineer

Nov 2019 – Jan 2022

O-me | Jerusalem, Israel

- Automated secure Cisco configuration workflows, significantly reducing deployment time across 130+ branch locations.
- Deployed 150+ secure network infrastructures utilizing FortiGate firewalls and Aruba/Meraki access points.
- Performed RF optimization and Wi-Fi heatmapping to ensure secure, reliable, and leak-free wireless coverage in complex architectural environments.

Systems Integration Engineer

Dec 2016 – Nov 2019

Kahane | Israel

- Engineered secure automation ecosystems for 70+ properties, enforcing strict firewall policies and VLAN isolation for vulnerable edge devices.

IT Infrastructure Engineer

Mar 2010 – May 2016

Rostman | Kazakhstan

- Administered Windows Server environments and virtualization platforms, enforcing access controls for SMB clients.
- Implemented structured data backup strategies and disaster recovery procedures to ensure business continuity.

EDUCATION & CERTIFICATIONS

- CompTIA Security+ (In Progress - Exam Scheduled Q2 2026)
- CompTIA Network+ (In Progress)
- M.Eng. Radio Engineering & Electronics, 2012
- B.Eng. Telecommunications, 2010
